I have been an XM Satellite subscriber for more then 3 years now. I have made this choice so that I DON'T have to listen to numerous commercials and talking heads that are nothing more then annoying. I believe the NAB should progress with the times and realize that we all don't need nor want what they think is good programing. XM satellite radio give me the freedom and choice to listen to what I want without having to have people talking at me and 20 minutes of commercials every hour. Times are changing with all of our technological advances. This includes pay per use radio to receive what I want to listen too without commercials. These rights are protected by the first ammendment and this challenge should be disregarded as there are NUMEROUS other issues that are much more pressing for all members of Congress to consider in the world which we live in today. Please use your position as well as my tax dollars to make the U.S. safe from terrorism and the threats we face today.
